PROFESSIONAL SUMMARY

B.Tech AI and ML student with experience in machine learning, data analytics, and software development. Built and deployed multiple projects involving NLP, financial risk analysis, and predictive modeling using Python and modern ML frameworks. Seeking opportunities to apply technical skills to real-world engineering and data-driven challenges.

EDUCATION

Symbiosis Institute of Technology

Nagpur, Maharashtra

Bachelor of Technology in Computer Science (AI & ML)

Aug 2023 – May 2027

- **Relevant Coursework:** Data Structures & Algorithms, Machine Learning, Neural Networks, Statistics for AI, Linear Algebra, Database Management Systems, Natural Language Processing.

TECHNICAL SKILLS

Programming Languages: Python, SQL, HTML5, CSS3, JavaScript (ES6+), Java

AI/ML Frameworks: TensorFlow, PyTorch, Keras, Scikit-learn, Hugging Face Transformers

Data Libraries: Pandas, NumPy, Matplotlib, Seaborn, NLTK, OpenCV, Spacy

Tools & Cloud: Git/GitHub, Docker, Streamlit, Vercel, Google Colab, Jupyter, VS Code, yfinance API

Core Competencies: Predictive Modeling, Sentiment Analysis, MLOps, Data Mining, Time-Series Forecasting

PROJECTS

RiskSight | *Python, Streamlit, Scikit-learn, LangChain, Llama 3.1, yfinance*

- **Purpose:** Automated corporate financial auditing by cross-referencing real-time quantitative distress signals with live market context.
- **Implementation:** Engineered an 18-feature Random Forest model integrated with a generative RAG pipeline. Deployed a resilient, serverless Streamlit architecture with custom data-patching algorithms, achieving institutional-grade inference at **\$0 infrastructure cost**.
- **Impact:** Compressed manual financial research workflows from **hours to under 5 seconds** with **100% pipeline stability**, delivering instant, free risk mitigation metrics to users.
- **Links:** [GitHub Repository](#) | [Live Production App](#)

GameLens | *Python, Streamlit, Scikit-learn, yfinance, VADER NLP, REST APIs*

- **Purpose:** Built a predictive data pipeline linking unstructured public gaming discussions directly to corporate stock market volatility.
- **Implementation:** Developed an asynchronous data-mining architecture using VADER NLP to ingest high-frequency data streams seamlessly. Leveraged open-source frameworks and free-tier APIs to engineer a hybrid prediction algorithm with **zero database or monetary overhead**.
- **Impact:** Scaled the pipeline to process and evaluate over **10,000+ localized discussions**, drastically reducing ingestion latency to deliver real-time stock trend predictions.
- **Links:** [GitHub Repository](#) | [Live Production App](#)

EXPERIENCE

WEMET Pharma

Maharashtra, India

Front-End Developer

June 2025 – Aug 2025

- Implemented a mobile-first responsive design strategy, ensuring seamless functionality across a variety of devices and browsers, which improved mobile traffic retention by 20%.
- Collaborated with cross-functional backend and UI/UX teams to integrate RESTful APIs, resulting in a 25% improvement in site navigation efficiency and overall user satisfaction.

CERTIFICATIONS
